BUJÍAS  
**HESCHER**®  
IGNICION

# LA EMPRESA

**Hescher®** es actualmente, una empresa consolidada a nivel internacional que se encuentra posicionada como líder del mercado argentino en el diseño, producción y comercialización de bujías para motores Diesel; siendo el primer referente de ventas en el sector aftermarket de autopartes.

**Nuestra misión:** fabricar respuestos de alta calidad utilizando materia prima de excelencia, con el objetivo de cumplir con nuestros requisitos de aptitud diferenciada.

**Nuestra visión:** ser reconocidos como líder en el diseño, fabricación y comercialización de autopartes en Latinoamérica y en todo el mundo, por parte de nuestros clientes, proveedores, consumidores y todos los grupos de interés relacionados con la actividad de nuestras compañía.

## NUESTROS VALORES:

- Construimos **relaciones cliente-vendedor** basadas en la consideración, el respeto, la responsabilidad y el profesionalismo; brindando así respaldo y seguridad.
- Promovemos la disciplina y el trabajo en equipo, para innovar en competitividad, procesos y producto final.
- Creemos en la capacitación activa del personal y el reconocimiento del esfuerzo y trabajo diario.
- Nos comprometemos con el cuidado del medio ambiente, haciendo un seguimiento de los insumos utilizados, de los procesos de fabricación y de la desposición de residuos, según las normativas vigentes.

Hoy con más de **70 años** de historia capitalizamos toda nuestra experiencia, ofreciendo un producto íntegramente argentino, confiable y de calidad inter-

nacional, exportando a más de **25 países** en todo el mundo.

El mantenimiento de nuestro compromiso con la calidad y la mejora continua, la seriedad con la que gestionamos la comercialización, la responsabilidad asumida, la credibilidad y fundamentalmente, el reconocimiento de la marca, dio origen a la expansión de la línea de productos **Hescher®**.

En los últimos años desarrollamos:

- **Bujías Hescher® Diesel**
- **Bujías Hescher® Nafta**
- **Bobinas de encendido**
- **Bombas de combustible**
- **Cables de bujías**
- **Motores paso a paso**

Con una propuesta de valor única y una innovación eficiente, dentro de la fabricación nacional, que nos permite cumplir los requerimientos de todas las marcas y modelos de vehículos de nuestro mercado, logramos que **Hescher®** sea un producto altamente confiable, probado y aprobado por los más exigentes usuarios y profesionales del transporte.

Finalmente, la coordinación dentro de nuestra logística interna y externa, nos permite cumplir con la entrega de la mercadería en tiempo y forma, y nos promete con nuestro principal objetivo, que es alcanzar la satisfacción permanente de los clientes que confían en nosotros.

Por eso, hoy como ayer, cuando busques un producto de alta calidad, confiabilidad y respaldo, elegí **Hescher®**.

**Bujías Hescher®,  
un paso adelante  
en el mundo...**

# BOBINAS DE ENCENDIDO

Las **bobinas de encendido (B.E.)** suministran corriente de alta tensión a las bujías para **producir la chispa con el objeto de lograr una combustión óptima en el motor.**

Están compuestas por un bobinado primario, un bobinado secundario, un núcleo de hierro y una carcasa de material aislante, todo bañado en resina epoxi para asegurar una completa aislación eléctrica.

Si una **B.E.** funciona de manera irregular, el motor trabajará de forma incorrecta y no logrará desempeñar la potencia habitual del vehículo. Peor aún, si el motor lleva una sola bobina y esta no funciona, el vehículo no arrancará.

**Hescher®** presenta **la línea más completa de bobinas de ignición, de alto rendimiento y elevada confiabilidad para garantizar una respuesta eficaz a las exigencias de cada vehículo.**

## TIPOS DE BOBINA DE ENCENDIDO:

- **B.E. con distribuidor electrónico:** en este tipo de bobinas, la tensión generada es transportada a través de un cable de encendido hasta un distribuidor mecánico. Este distribuye la tensión a través de cables de encendido a cada cilindro del motor, de acuerdo al ciclo de trabajo.
- **B.E. de chispa doble:** la bobina doble está formada por dos devanados primarios, gobernados de forma alternativa, cada uno por una etapa del ciclo del motor, y dos secundarios unidos por sus extremos directamente a las bujías. Por ende, existen dos circuitos de encendido 1-4 y 2-3 en el motor de cuatro cilindros y tres circuitos de encendido 1-5,4-3 y 2-6 en el motor de seis cilindros.
- **B.E. modular:** esta compuesta por varias bobinas de encendido dependiendo del número de cilindros; sin embargo, funciona como una bobina de chispa simple. Le provee al compartimiento del motor una estética más ordenada.

- **B.E. tipo lápiz:** estas bobinas se colocan directamente sobre la bujía. Cada bujía tiene su propia bobina de encendido. Debido a su diseño compacto y la ausencia de cables de encendido, este sistema de bobinas es el que presenta menor pérdida de tensión.

- **B.E. híbrida:** la bobina híbrida alimenta dos bujías simultáneamente, una a través de un conector ubicado en la parte inferior y otra mediante un cable de bujía conectado en la parte superior de la bobina.

## Por qué elegir bobinas de encendido HESCHER®:

Excelente materia prima: sólo se utilizan materiales de óptima calidad, esto se traduce en un mejor desempeño y mayor vida útil.

**Tecnología superior:** la calidad del producto y la consistencia en los procesos de fabricación está asegurada con el mantenimiento del Sistema de Gestión de la Calidad, cumpliendo con los requisitos exigidos por la Norma ISO/ IS 16949:2009.

**Confiabilidad:** el 100% de las bobinas de encendido **Hescher®** son testadas antes de ser embalados para su venta, de este modo nos aseguramos de que el cliente obtenga un producto confiable y de excelente funcionamiento.- [ ]
